THE 1st INTERNATIONAL EXHIBITION & SUMMIT ON MODERN RAILWAY TECHNOLOGY AND INFRASTRUCTURE CONSTRUCTION SUPPLY CHAIN IN VIETNAM 2025

EXHIBITION REPORT

Time: 12-15/11/2025

Venue: Vietnam Exhibition Center - VEC

To contribute to the realization of the major orientations of the Party, the National Assembly, and the Government in the national railway development strategy, advancing toward a modern, synchronized, internationally integrated railway network under the guidance of the Ministry of Construction of the Socialist Republic of Vietnam, **the 1st International Exhibition & Summit on Modern Railway Technology and Infrastructure Construction Supply Chain in Vietnam (VRT & CON'2025)** will be held from **12–15 November 2025** at the **Vietnam Exhibition Center (VEC), Hanoi, Vietnam**.

VRT & CON'2025 consists of:

+ **Exhibition Area:** Over 5,000 m² with more than 200 booths dedicated to organizations and enterprises from countries with advanced railway systems, such as the UK, Germany, Korea, Japan, France, Finland, Spain, China, etc., showcasing products and technologies;

+ **International Conference Sessions:** A global gathering featuring multiple expert-led sessions on planning, infrastructure construction, signaling systems, IT applications, operations management, high-speed railway operations, urban and intercity railway development, and technology adoption. Renowned international and domestic specialists will present and share insights.

VRT & CON'2025 serves as a premier, high-level platform connecting government agencies, state investors, infrastructure operators, railway transport enterprises, rolling stock manufacturers, equipment suppliers, construction and engineering firms, and technology providers. The exhibition fosters the exchange of advanced technologies and trends in modern railway systems, as well as integrated design solutions that directly support the operations and maintenance of railway routes, especially high-speed rail, aligned with Vietnam's investment roadmap. It promotes technology transfer, equipment localization, and the development of high-quality supply chains and human resources for the railway industry.

The Organizing Committee and coordinating authorities respectfully welcome **Government agencies, Associations, Enterprises, Experts, and Partners from Vietnam and abroad** to participate in **the 1st International Exhibition & Summit on Modern Railway Technology and Infrastructure Construction Supply Chain in Vietnam 2025**.

01

Shape and orient the development of Vietnam's railway industry ecosystem, including enterprises, research organizations, and regulatory agencies, to support innovation and modernization in the Vietnamese railway sector, especially in the context of implementing new national railway projects.

02

Promote an open innovation model through collaboration among businesses, government bodies, and educational institutions in the transportation sector in general, and modern railway technology in particular.

03

Create opportunities for domestic and international enterprises to engage in networking, cooperation, product demonstrations, and technology showcases; share **best practices in talent attraction and training** to meet the requirements of smart transportation; and contribute to **developing modern transport infrastructure**, including urban railways and high-speed rail systems.

04

Support connections and technology transfer between businesses and potential partners.

05

Update the latest technological trends in urban transport, high-speed railways, electrified rail systems, and modern transport infrastructure construction. Railway technology represents **advanced, modern global innovation**, with strong expertise from countries such as France, Germany, Spain, Japan, China, and Korea.

The VRT&CON 2025 Exhibition concluded with resounding success, marking one of the most notable industry events of the year. Throughout its duration, the exhibition attracted more than 12,000 visitors, including businesses, industry experts, and a large number of attendees interested in modern railway technology solutions and infrastructure construction supply chains.

Organizing Committee:

Guiding Authority: **Ministry of Construction**

Steering Committee Units:

- Viet Nam Railway Authority - Ministry of Construction
- Railway Project Management Board, Ministry of Construction - PMUR
- Department of Security Industry - Ministry of Public Security

Main Organizing Units

- HTECH Engineering and Technology Joint Stock Company
- Open Innovation and Technopreneur Institute
- Bach Dang Single-Member Limited Liability Company - General Department of Industrial Security - Ministry of Public Security
- CAMEL Events Exhibition and Trade Promotion CO., LTD

Partner Units

- Delegation of German Industry and Commerce in Vietnam
- University of Transport and Communications
- Policy and Strategy Consulting Center (PSST)
- Sunny Vietnam

Time: **12/11/2025 – 15/11/2025**

Venue: **Vietnam Exhibition Center (VEC),
Truong Sa Road, Dong Anh Commune,
Hanoi City.**

EXHIBITORS

OPENING CEREMONY

12/11

VRT&CON 2025

VIP GUESTS AT THE OPENING CEREMONY

1. Mr. Nguyen Danh Huy - Deputy Minister of Construction

2. Ms. Helga Margarete Barth - Ambassador of the Federal Republic of Germany to Vietnam

3. Mr. Tran Thien Canh - Director General, Vietnam Railway Authority

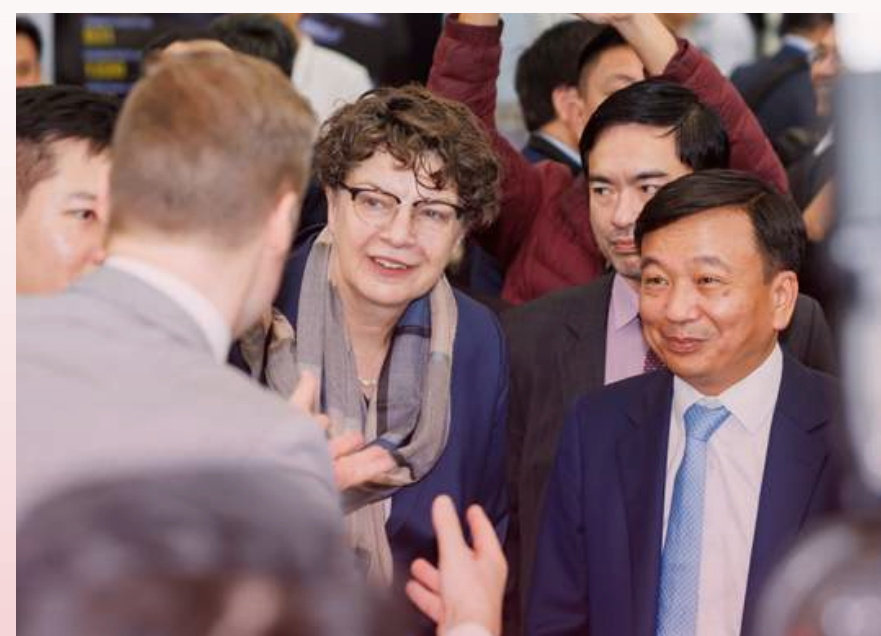

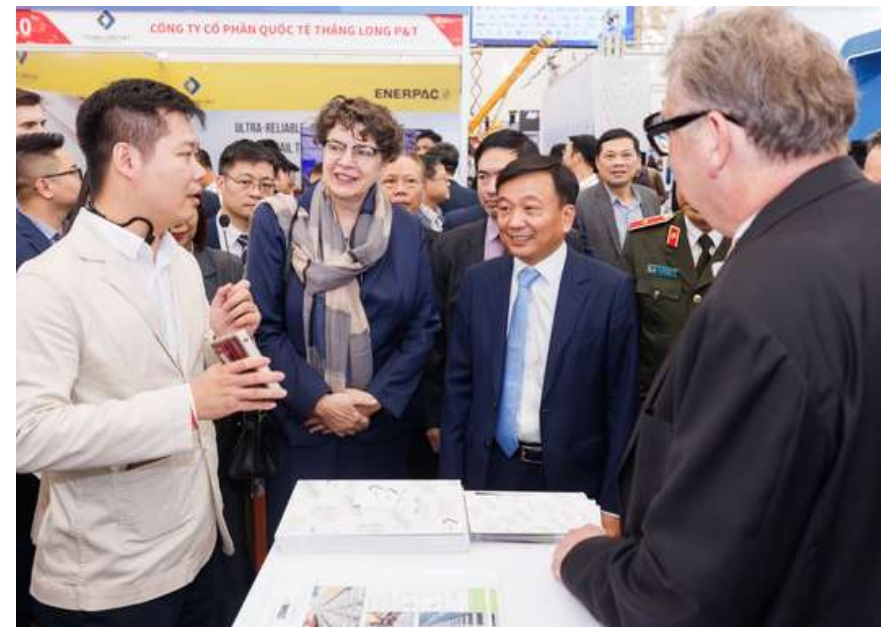

4. Mr. Luu Hong Quang - Director General, Department of Security Industry

5. Assoc. Prof. Dr. Nguyen Van Hung - President, University of Transport and Communications

6. Mr. Bjoern Koslowski - Deputy Chief Representative, Delegation of German Industry and Commerce in Vietnam (AHK)

7. Dr. Khuat Viet Hung - Chairman, Members' Council of Hanoi Metro

8. Mr. Vu Duc Cong - Ambassador of Australia

VIP TOUR

12/11

The VIP Tour was organized to welcome high-level delegates and representatives of major domestic and international enterprises to visit key exhibition booths. The tour highlighted the most prominent technologies, technical solutions, and products at the exhibition, providing senior leaders and major sponsors with valuable opportunities for short, high-level interactions and engagement.

VRT&CON 2025

PANEL DISCUSSIONS

12/11

Session 1: The Future of Vietnam Railways in the Global Supply Chain

The discussion provided a comprehensive overview of planning, policy orientation, and long-term vision for the development of Vietnam's railway network in the context of global supply chain integration. With insights shared by government regulators, international organizations, and leading domestic and international enterprises, the session emphasized the crucial role of the railway sector in industrial development, localization, enhanced connectivity, and international cooperation.

12/11

Session 2: CEO Roundtable

Topic: Advice on developing Vietnam's Railway industry: Opportunities, Challenges and Policies

The high-level policy dialogue brought together Government leaders, regulatory authorities, and CEOs of multinational corporations to contribute strategic insights for advancing Vietnam's railway industry. The roundtable focused on key issues such as PPP models, capital structuring, technology transfer, localization, and finalizing the policy framework to effectively implement large-scale national railway projects.

12/11

Session 3: Investment Connection Seminar

The session served as a direct networking platform for investors, financial institutions, EPC contractors, and Vietnamese and international enterprises in the railway infrastructure sector. The discussion clarified collaboration opportunities, partnership demands, available resources, and technology capabilities, thereby fostering concrete cooperation commitments and jointly promoting the sustainable development of Vietnam's railway industry.

13/11

Session 4: Seminar on Introducing Technology Solutions for Railway Infrastructure Development

The session focused on connecting welding - engineering - technology practices with practical applications, clarifying cooperation opportunities, technology transfer potential, and the adoption of innovative solutions aligned with the **“Made in Vietnam”** orientation.

The discussion covered a comprehensive range of railway infrastructure topics, including surveying, tunneling, geological engineering, tracks and switches, system electrification, operational optimization, and safety solutions for sustainable maintenance and reduced urban vibration impacts.

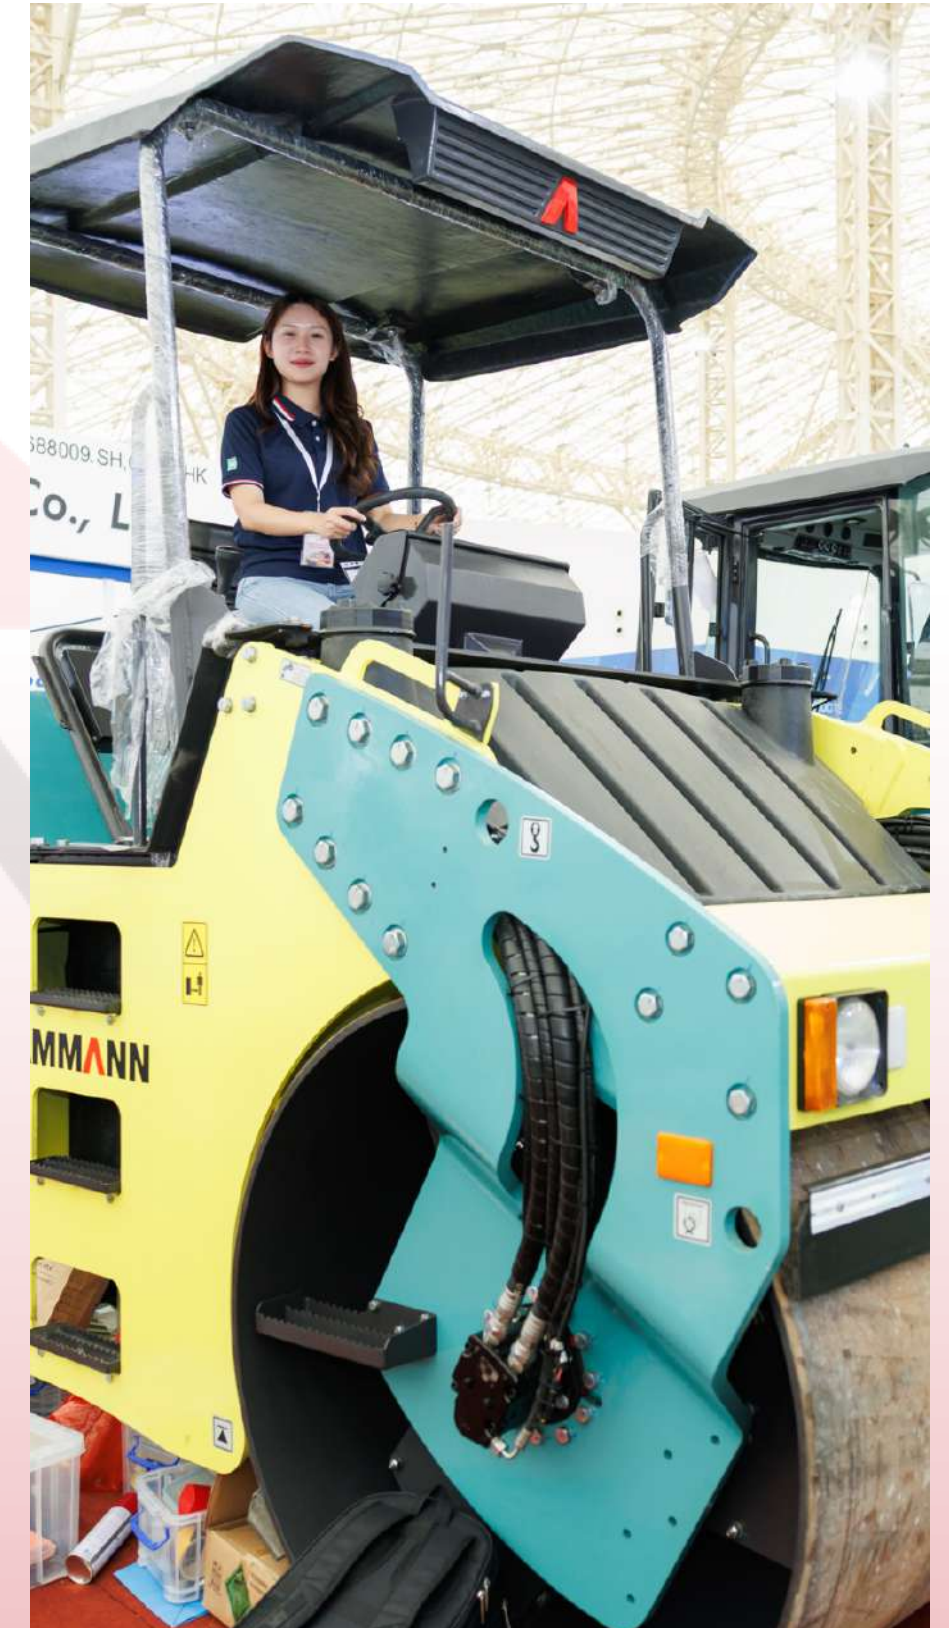

MOU SIGNING CEREMONY VIP LUNCH AT VRT&CON 2025

12/11

The VIP Lunch at VRT&CON provided an important opportunity for leaders and partners to meet, expand networks, and promote strategic cooperation. Within the framework of the event, the MOU signing between MICO Group and Vĩnh Hưng and their partners marked significant progress in strengthening collaboration, expanding partnerships in modern railway technologies, and developing the infrastructure construction supply chain in Vietnam.

OVERVIEW OF COMMUNICATION ACTIVITIES

OBJECTIVES

- A comprehensive event communication plan across all channels.
- The first year of organization lays the foundation for subsequent events.

MAIN RESULTS

- Widespread, organic media coverage across various channels.
- The communication campaign successfully enhanced brand awareness for VRT&CON 2025, attracted strong industry attention, and established a solid foundation for expanding international partnerships and future editions of the exhibition.

OVERVIEW OF FANPAGE CONTENT

- The most popular content is related to photos.
- The age group most interested in the program is 25-44 years old.
- The fan page does not run ads, so the metrics are organic and views come from external businesses.
